Hi,

We came across your AI automation workshop offering and we're interested in enrolling four people from our operations team.

Participant details:

1. Marco Bianchi - Head of Operations
2. Giulia Ferrero - Marketing Manager
3. Davide Conti - IT Coordinator
4. Elena Moretti - Customer Service Lead

Before we confirm, I have a question: does the workshop cover integrating WhatsApp-based customer automation? That's our main need right now. Also, could you tell us the price for a group of four, and whether it can be delivered remotely in English?

Looking forward to hearing from you.

Best regards,

Marco Bianchi
