

Internal Report - Automation Projects Summary

Prepared by: Operations

Date: August 1, 2026

Summary

During July 2026, three client automation projects were completed: a lead-qualification workflow, an update to the WhatsApp booking agent, and a content scheduling pipeline. All three projects were delivered within the agreed scope and no outstanding client issues were reported during the month.

System uptime across all active n8n workflows remained above 99%. No security incidents were recorded.

This report is for internal record-keeping only.
